

Cookies Policy

Cookies and how they benefit you:

Our website uses cookies, as almost all websites do, to help provide you with the best experience we can. Cookies are small text files that are placed on your computer or mobile phone when you browse websites

Our cookies help us:

Make our website work as you would expect, remember your settings during and between visits and improve the speed/security of the site

We do not use cookies to:

Collect any personally identifiable information, collect any sensitive information, pass data to advertising networks, or pass personally identifiable data to third parties

Granting us permission to use cookies:

If the settings on your software that you are using to view this website (your browser) are adjusted to accept cookies we take this, and your continued use of our website, to mean that you are fine with this. Should you wish to remove or not use cookies from our site you can learn how to do this below, however doing so will likely mean that our site will not work as you would expect.

Website function cookies:

We use cookies to make our website work including:

- Remembering your search settings
- Showing you which pages you have recently visited
- Remembering your preferences such as colours, text size and layout

There is no way to prevent these cookies being set other than to not use our site. In certain circumstances, data may be shared with the regulators of the SLCF or LCF as dictated by those schemes' regulations. We will never share your information with third parties for commercial reasons

Third party functions:

Our site, like most websites, includes functionality provided by third parties. Disabling these cookies will likely break the functions offered by these third parties

Anonymous visitor statistics cookies:

We use cookies to compile visitor statistics such as how many people have visited our website, what type of technology they are using (e.g. Mac or Windows which helps to identify when our site isn't working as it should for particular technologies), how long they spend on the site, what page they look at etc. This helps us to continuously improve our website. These programs also tell us, on an anonymous basis, how people reached this site (e.g. from a search engine) and whether they have been here before.

We use: Google Analytics

Turning Cookies Off:

You can usually switch cookies off by adjusting your browser settings to stop it from accepting cookies. Doing so, however, will likely limit the functionality of ours and a large proportion of the world's websites as cookies are a standard part of most modern websites.

It may be that your concerns around cookies relate to so called "spyware". Rather than switching off cookies in your browser you may find that anti-spyware software achieves the same objective by automatically deleting cookies considered to be invasive.
